

Education Council met on January 13, 2022 and approved the following:

Academic Courses

students are required to attend and complete a minimum of 2 unique non-credit workshops which supplement their Knowledge, Skills or Abilities related to the field.

The creation of a series of workshop opportunities allows for the micro credential to ensure that the most current and topical challenges to the industry can be easily incorporated into the curriculum. It also allows the inclusion of visiting Industry professionals, industry certification bodies and others to provide instruction and hands-on, work-integrated learning for the micro credential.

Academic Programs

Micro-Credential

New program:

1. Vineyard Establishment and Sustainability Micro-Credential

Proposal Rationale

This initiative will develop and deliver a new micro-credential (MC) for the viticulture sector focusing on vineyard canopy, pest and water management, with an underlying sustainability theme. This MC is based on specific competencies needed to meet skill and labour shortages within the viticulture sector as identified by the BC Wine Grape Council's Viticulture Sector Human Resources Steering Committee.

The program is designed to include core curriculum of 3 courses currently offered as part of existing Viticulture credentials with an additional requirement of 2 unique workshops. This micro credential is intended to be a series of courses that can be taken in short duration, leading to employment or increased employability, and provide students with concrete knowledge, skills and abilities that will support their personal or career goals.

The core curriculum allows students to establish a standardized knowledge base. The workshops allows students to choose learning opportunities that best meet their interests. The feature of integrated workshops also means that the curriculum has built in flexibility that allows for the inclusion of cutting edge research or presentations on solutions to current topical issues. It also allows for the integration of knowledge from visiting researchers, industry professionals, or from local industry groups.
